- [Roles for Delivering Country Workstreams](#)

Chapter 6. How does PAGE inspire and inform?

- [Communication, Publications, Branding and Document Management](#)

About this Document

The Operational Manual has been developed by the Partnership for Action on Green Economy (PAGE) to support the implementation of the [Updated PAGE Strategy 2021-2030 From Recovery to Transformation: Greener, Circular and Job-Rick Economies by 2030](#). It updates the earlier Operational Manual in place up to 2024.

What does it contain?

The manual introduces PAGE and its approach and processes including PAGE's country, global and regional engagements, reporting and governance structures. It serves as a practical reference to ensure that activities are implemented in line with the partnership's shared objectives. The document is not exhaustive and for specific questions the user can contact the PAGE Secretariat.

Who is it for?

This guidance is primarily for PAGE agency focal points, national focal points, government counterparts, and PAGE country teams involved in implementing PAGE. It clarifies institutional roles, planning process, reporting requirements, and coordination mechanisms to ensure that all stakeholders share a common understanding of PAGE's procedures, responsibilities, templates, and mechanisms.
